

Hand Held Auxiliary Hydraulics

6 Position Adjustable Relief

For CASE 400 Series Skid Steers

Specifications

Flow:	3, 5, 7, 9, 12 or 15 gpm
Pressure (Adjustable):	250 - 3,000 psi
Factory Set Pressure:	2,100 psi
Quick Disconnects:	1/2 in.

Features

Allows precise control of hydraulic flow to match the needs of each hand held hydraulic work tool.

Six position flow selector locks in flow at 3, 5, 7, 9, 12 or 15 gpm and is quickly and easily adjusted. Adjustable relief to custom tailor the system to your work tools.

Loader arm mounted quick disconnects and an on-off switch for ease of operation.

Parking brake must be set to operate hand held hydraulics.

Benefits

Roads and Bridges: Allows use of hand held breakers, diamond chainsaws, chipping hammers, tampers for compacting soil and hand held core drills for taking core sample or installing re-bar.

Municipalities: Allows use of additional hand held work tools such as earth augers, trash pumps, post drivers, digging spades, cut-off saws, tree trimmers, impact wrenches, drills and crimping tools.

There's no need to haul around expensive stand alone hydraulic power units. The BIC hand held kit turns your existing skid steer into a full service work station for all your equipment needs.
