BIC

BOOM GUARD

APPLICATIONS

BIC boom guards can be used in any application which may result in accidental damage to the ductile boom, hydraulic hoses or tubes.

FEATURES

- High strength and wear-resistant T-1 steel
- Custom designed to fit 580 and 590 backhoes with ductile boom
- Includes pocket for hammer point to eliminate point vibration during transportation and accidental hammer leak-down
- Easily installed by one person in about 10 minutes
- Bolt-on clamp design does not affect structural integrity of ductile boom - no welding, grinding or drilling required

KEY ADVANTAGES

- Low-cost protection prevents expensive boom repairs due to accidental damage by hammer point
- Boom hoses and tubes are protected from roots, concrete, re-rod, etc. during normal backhoe operation.
- Ideal for preserving your rental unit investment

BIC Part #	TRACTOR
