OTHER BIC PRODUCTS

- Predeliveries - Burlington, IA / Wichita, KS
- Auxiliary Hydraulic Kits
- Boom Guards
- Front Fenders
- Mirrors
- Special Features

The new BIC stabilizer cylinder rock guards were developed by Coneqtec Corporation specifically for Case 580L, 580SL and 590SL backhoes and are sold exclusively through Case Dealers.

Made of high strength 50,000 psi minimum tensile steel, these guards are a "must have" for rental, municipal and field units involved in demolition or loading rock, concrete or heavy objects that if accidentally dropped could cause damage to the stabilizer cylinder rods.

The BIC stabilizer cylinder rock guards are compatible with cleated dirt, cemetery or combination flip-over stabilizer pads and can be easily installed in the field. For new units, factory installation is available upon request at our Burlington location.
